Leaf: Black, deep burgundy leaves

Mature Size: 1.0m H x 1.0m S/Trunk forming

Preferred Location: Patio container (summer)/Conservatory (winter)/Mixed planters

Likes: Full sun or partial shade/Sheltered location on patio, balcony or conservatory

Dislikes: Water logged soil and temperatures below +3°C

Grown in: Ireland

Cordyline CARUBA Black is an ideal plant for your mixed planter containers or summer bedding plantations. With its dark foliage and vigorous growth it can be easily incorporated in colourful arrangements in combination with flowering bedding plants or other coloured foliage plants. It is of course also an ideal plant for your patio container, but needs a frost free, bright location over the colder months. CARUBA Black can be grown in conservatories winter and summer.
