

Libertia ixioides Goldfinger^{PBR}

Looking for fantastic golden yellow cascading foliage in the garden. This is the plant for you. The elegant weeping foliage of this exciting new selection has a prominent golden yellow central stripe. Profusions of pure white star like flowers are produced in clusters just clear of the foliage from mid spring, followed by attractive large yellow berries in autumn. This delightful little plant really packs a punch & is ideal to provide year round interest in the perennial border or as a colourful low maintenance pot or container on the deck or patio.

CARE & HANDLING

Hardiness: Hardy to -12°C (USDA Zone7).

Bloom: Profusions of pure white star like flowers from mid spring.

Foliage: Elegant weeping foliage with a prominent golden yellow central stripe.
